

UV Backlit 180(TEU300)

GENERAL INFORMATION

- » **Product Description** UV backlit is a single side coated, antistatically - treated polyester backlit film for UV -curable ink Direct Image on the front (Satin) surface yields images with maximum ink density, vivid color and high image resolution for either reflective or backlit viewing in both indoor and outdoor applications.
The special satin coating is adopted to the gloss level of UV curable ink to reduce finish difference The fixation of the UV ink to the surface is very strong and UV lamb can be run on reduced performance. (Low) to avoid high temperatures and a possible cracking of the ink.
- » **Special Feature** Premium flatness PET Based
Premium White color surface
High quality color reproduction with and without light
Stability of production and printing
Anti-Scratch (Hardness surface)
- » **Physical Feature** 180 Micron Caliper with special base material / Glossy finished surface
- » **Areas of Application** Light Box Advertisement
But & subway Advertisement
Department store display
Photo quality printing
- » **Inks of Application**  UV-curable
- » **Printer Applications** Colorspan ,Zünd UVjet ,UV-curable Scitex , StellarJet, Oce UV Inkjet Printer

ORDER INFORMATION

- » **Order Code No.** TEU300-- : UV BACKLIT 180
- » **Available Sizes** 36" x 50m 50" x 50m 60" x 50m
- » **MOQ** 200 rolls per width

TECHNICAL INFORMATION

» Physical Properties	Valuation	Test Standardization
Caliper	180Micron	ASTM D645
L.a.b	85 / -1 / 0	ANSI T(D50/2°/Abs/No)
Yellowness	40	ASTM D1925
Glossiness	5 / 15	ASTM D2457

STOCKING INFORMATION

- » **Storagee** Products are recommended to avoid direct sunlight and keep at a chilly place.
Resual cloth puts it in a vinyl bag like finished goods packing,
and I keep it after box packing after use.
